

## JUST GLEANINGS

### ALTA. POPULATION INCREASES

The total population of Alberta in June of last year, including members of the armed forces, was 118,122,000, compared with 116,450,000 in 1942, an increase of 188,000. Alberta's population increased from 776,000 to 792,000.

### GAS RATION TO BE SAME

Munitions department officials said recently there was no immediate danger of a gas ration in the value of Canada's gasoline rationing campaign, now worth three gallons each.

"Of course we can't predict very far into the future," said a spokesman, "and right now we aren't even thinking of it."

Munitions Minister Howe told the commons in a review of the petroleum situation, "We feel that Canada's supply position had not improved."

### QUEBEC ELECTION AUGUST 8

General provincial elections will be held in Quebec province August 8, Premier Godbout announced in a radio address on Friday.

The Liberal government of Maurice Duplessis has called a general election of October 25, 1938, replacing the Union Nationale administration of Maurice Duplessis.

### SOME PRESERVES ON RATION

Canned blueberries, blueberry pie and canned crabapples were permitted to be rationed by the Department of National Resources on July 1. Purchases of these fruits must now be made by coupon at the rate of one D coupon for 20 fluid ounces of crabapples, or 12 fluid ounces of blueberry pie filler, sweetened or unsweetened, and 20 fluid ounces of canned crabapples.

### HELP TO FLOODED AREAS

A grant of \$5,000 has been made by the Alberta Government to help flood victims in Ontario, where conditions were not quite so bad, to take care of emergency cases resulting from flood conditions in Northern Ontario. The Alberta Government is also appealing to the Dominion Government for some assistance for about 500 persons in areas damaged by floods. In addition to this the Alberta Livestock Co-Operative is asking for contributions of live stock to replenish the number of animals killed by that disaster.

### CRF FARM COMMENTATOR IN SPECIAL BROADCAST JULY 17

Peter Whittle, CBC Farm Commentator for the Prairie Region left Winnipeg on July 14 for Carbon, which will take him on a wide sweep through the southern Alberta ranch country and land him in the middle of Carbon. After spending a week in southern Alberta Peter will visit George Burton's V bar T ranch near Medicine Hat, and the Dominion Range Experiment Station at Lethbridge. He will be heard in a special broadcast on his impression of the Calgary Stampede from Monday, July 17 at 8:30 p.m. from Calgary.

## INCH OF MOISTURE GREATLY BENEFITS GROWING CROPS

### Stubble Land Suffers In Some Parts of District

An inch of rain fell in the district over the week end and came just at the right time to help the growth of the case of some late sown fields, and harvest is expected to be early this year. The stand is fairly heavy and the crop will be needed for a large crop.

There have been reports in the area around the Leo Brown, John McEwan and Bill Thompson farms where stubble crops have been practically ruined due to the dry weather and ruined the day after last week. In this case the showers did not fall all night and did not fall there, while on all sides considerable moisture was received.

According to reports, stubble land in this particular part of the district will not yield much grain.

Crops as a whole around Carbon are making good progress, and are particularly healthy, except in the case of some later sown fields, and harvest is expected to be early this year. The stand is fairly heavy and the crop will be needed for a large crop.

There have been reports in the area around the Leo Brown, John McEwan and Bill Thompson farms where stubble crops have been practically ruined due to the dry weather and ruined the day after last week. In this case the showers did not fall all night and did not fall there, while on all sides considerable moisture was received.

According to reports, stubble land in this particular part of the district will not yield much grain.

### CANNING SUGAR COUPONS

Canning sugar coupons F6, 7, 8, 9 and 10 may be used for 6 for the purchase of five pounds of sugar according to the Ration Administration. F coupons are found in Ration Book 3. The first group, F-1 is inactive and valid until May 20, and with the second group of sugar coupons valid this week housewives are now enabled to buy their full quota of sugar for domestic purposes. F coupon is good for one pound of sugar. All F coupons are valid until declared invalid by the Prices Board.

These coupons are to be used by processors ready made, to make them.

Those who exchange their F coupons for D coupons may exchange E coupons for D preserves coupons at any Local Ration Board. The rate of exchange is one D coupon for each F coupon.

## SWIMMING POOL IS OFFICIALLY OPENED FOR THE SEASON

### Co-operation of Parents and Children Requested

The Carbon Community Swimming Pool is now officially open for the season and Harry Hunt, temporarily take charge and will look after the pool for the time being.

Dues are the same as last year and membership is paid immediately by swimmers, bathers, dippers and bathers, swimmers who make use of the pool and the shower lathes.

The co-operation of the swimming pool requests the co-operation of the parents and children in operating the pool, and if any child attending will be tolerated, and unless harmony can be maintained it may be necessary to close the pool.

The Carbon Community Swimming Pool is a feature attraction to the town and district and the many towns of the province. It is a fine example of community endeavour, and the support of the entire community is needed if it is to continue to be operated.

## HOWARD HAMMELL, THE S.C. CANDIDATE, SPEAKS AT CARBON

### Explains Social Credit Principles to Audience

Mr. Howard G. Hammell, farmer and Social Credit candidate for the Didsbury constituency, had a very interesting meeting in the School Hall, Carbon, on Wednesday night, July 5, with 40 adults present, and W.A. Braisher of Carbon, the chairman of the organization introduced Mr. Hammel to the audience.

At the Friday Morning Livestock Show, the annual parade of the West's finest animals across the platform, the children will be entertained by selected attractions, a clown, a horse show, and by the antics of several clowns.

The Carbon United Church Choir will render special music at Garrett on Sunday afternoon at 3:30 o'clock.

### INDIA WELCOMES THOUSANDS OF WEST AFRICAN SOLDIERS

For the first time in the history of the four West African colonies, a West African force has left Africa for an overseas theatre of war. The Royal West African Frontier Force expeditionary force, which was listed in the free list by the Haley 1941 budget, is good for one pound of sugar. All F coupons are valid until declared invalid by the Prices Board.

These coupons are to be used by

processors ready made, to make them.

Those who exchange their F coupons for D coupons may exchange E coupons for D preserves coupons at any Local Ration Board. The rate of exchange is one D coupon for each F coupon.

most intelligent young West African trained and equipped for all the mechanical complexities of modern war.

in India, where West African troops

are training.

## TARIFF CUTS WILL BENEFIT FARMERS WHEN STOCKS SOLD

### Saving Should be From 17½ To 35 Per Cent

Federal authorities have ruled that full reduction of prices due to complete elimination of the existing tariffs from machinery and implements must be passed on to the farmers who buy them. This action follows the most sweeping reduction on agricultural machinery since the Canadian Policy was originated in the last century. Practically all agricultural implements now listed in the free list in the free list by the Haley 1941 budget, get a goal at which farmers' organizations have been aiming for many years. In addition, the new tariff was exchange tax on farm implements, which has been taken off. Resulting overall tariff cuts run from 17½ to 35 per cent.

The government has made it plain that farm machinery and implements are to remain on the free list, so that the major cut in the substantial lowering of prices. Just now the main equipment available for import from the United States are tractors, tractors as well as farm implements, and labor decrease, most equipment used on the farm will be buyable from the United States as well as from Canadian factories.

Prices will remain at current levels until dealers dispose of stocks bought before the budget and upon which they have not yet paid any exchange tax. Removal of the tariff from farm equipment gives government money to put a broader agricultural base on a wide scale, protection for cheap and easier farm credits.

Mrs. W.H. Lovins was operated on this week in the Lethbridge hospital and her many friends wish her a speedy recovery.

## LONG YEARS AGO

July 6, 1933

15 ball games were played at the Carbon Club Sports on June 30.

G.L. MacGregor is the new manager of the Bank of Montreal.

120 entries were received for the Carbon District Ladies Tennis Championships played at Carbon on July 1 and 2.

George Tropman has purchased the Perry Farm 3 miles west of town.

About half an inch of moisture fell last Wednesday night and crops are coming along fairly well.

Perry Johnson has completed his model of a Napoleonic coach and has entered it in the Fisher Body contest.

Prince Minister said that family allowances will not be brought in until after the election, as he did not want to change going out to Canadians just before an appeal to the people, as had been done by a Conservative Government.

### FEDERAL ELECTION TO BE HELD BEFORE JULY 1945

No extension of the life of the present Parliament is to be made, Prime Minister King has told the Parliament.

In the Commons the Prime Minister said that "there may be an election this year or next," but

he did not say when.

Mr. G. Rossell, S.J. Cannings and Fred Schell, and anyone interested

in the election will get in touch with any member of the House.

Twenty members were picked to attend the Alberta Farmers' Union convention at Fort Hall, Carbon, on Monday, July 2nd.

Considerable discussion took place on the question of having a co-operative bank established in Carbon.

A motion was passed that a committee

be appointed to find out just how

many people would be interested in

the formation of such a bank.

Mr. Hammell, and others interested

in the formation of the bank will be

invited to attend the meeting.

Another great saving to the people

of Alberta, pointed out Mr. Hammell,

was the reduction in the cost of life

insurance rates.

Insurance rates had been greatest

in the past, and the new rates will

be greatly reduced.

Health insurance rates will be

# Enemy War Industries Have Been Seriously Crippled By The Allied Air Offensive

**T**HIS Allied Air Offensive against Germany itself, the strategic bombing of the great industrial centres and war factories, has continued during the period of preparatory and tactical bombing in occupied France, Belgium and Holland. This has been very necessary, if only to prevent any recovery of the factories which suffered the great bombing offensive of 1943 and early 1944; it was essential, as it still is, to stop, not to allow the German war industries a breathing space.

This was all the more important because the damage to the enemy's forward airfields and supply lines would have a more serious effect than if the German war factories were prevented from making any adequate recovery. Krups of Essen, for example, was gradually being repaired. It was Germany's last single heavy engineering and armament plant, and if it could again produce locomotives and shells the ammunition dump destroyed in Northern France could be made available, possibly, to many more factories destroyed or seriously damaged during two months' bombing of the French and Belgian railways from the beginning of the war. The Germans of course could more easily be replaced. A major attack on Essen was therefore made by Bomber Command of the R.A.F. on the night of April 26th, 1944, and the results showed that the state in which they had been left after the attack on the night of July 25th, 1943, the last and most destructive of a series of attacks on Essen, had not been mended at all. Similarly, the destruction done on forward airfields in France and the Low Countries would be the most effective since the United States Strategic Air Forces had begun their attacks on aircraft factories and centres of the aircraft industry in Germany. Strategic bombing of Germany was an indispensable preliminary to the final assault, to air attack on the supplies and communications of the German armed forces in the West.

At the same time that the bombing was only one of many forms of offensive action on all fronts, which was prepared for, sustained and supported by the air attack on Germany itself. Some idea of the strain to which the German war industries have been subjected may be obtained from raid assessment, in terms of loss of man hours, of Bomber Command's 96 major attacks on 29 German industrial towns between October 1st to December 31st, 1943. It is estimated that these attacks cost the enemy 2,400,000,000 man hours, or 1,000,000 years. Assuming the whole of the losses to have been suffered in the towns attacked this is only 36.1% of the whole industrial output of these 29 towns, which included Berlin, during the nine months of attack, or 30% of their total output during the whole year. These figures are certain to be an absolute minimum because they have been reached without taking into account certain factors, such as loss of production resulting from administrative disorganization, which cannot be measured.

The twenty nine towns attacked were not, of course, selected at random from among the 1,000 target towns, but were chosen because they contained the highest proportion of essential war industries. They manufactured, for example, more than half the electrical engineering products, machine tools and rubber products, and one just under half the aero-engines, made in the whole of Greater Germany. So during a critical period, on the one hand, assuming Germany to be deprived of four months' output from every single industrial town not only in the largest but also in the most vital industrial centre in the world, and on the other hand, about three months later in the period for which these figures have been worked out, it was estimated that production in Berlin, the enemy's largest manufacturing centre, was 40% below what it was a year ago.

These figures do not take into account the loss of production caused by shortage of manpower resulting from the mobilization. It has been estimated, of at least 3,000,000 men into the active and passive defence of German cities.

Actual shortages of weapons on the battle front were not always easily detected for the reason that the enemy's first reaction to such a shortage will be to assume a defensive strategy and many cases defences fail. There can be no doubt that shortages from Allied air attack have played a great part in forcing the enemy onto the defensive on all fronts, by sea, air and land. But there has also been

## R.C.A.F. Girls Set The Style

—R.C.A.F. Photo

The smart hats and uniforms of Canada's Air Women are being copied by Britain's girls and milliners are featuring them for civilians as a craze of distinction. An English girl is shown displaying one of a Canadian W.D. office's collection of the R.C.A.F. hats and one of the most popular styles worn in Great Britain this summer. The civilian version comes in various colors but the shape is exactly like the Canadian Air Force service hat.

# Measures Have Been Taken To Protect Grains And Foods From Depredation Of Insects

DURING the first world war, insects destroyed large quantities of food stuffs, including flour, cereals, grain of all kinds and seeds. On the outbreak of the present war, Canadian authorities were on the alert. The Division of Entomology and the Division of Plant Protection, Science Service, Dominion Department of Agriculture, and the Board of Grain Commissioners, with assistance from the Agricultural Research Board, evolved a co-operative program to avoid losses from insect depredation, particularly of grains and other food products being shipped overseas.

## British Legion

### To Set Up Corps Of Domestic Workers After The War

The Women's Section of the British Legion proposes to set up a corps of domestic workers after the war.

The Legion's plan is to recruit housewives who have been working in munitions factories after the war. It will be composed of ex-service women for whom a residential club will be opened. The corps will wear the Legion's uniform and the corps offered will include cleaners, maid-servants, occasional home nurses, children's nannies and newsreaders.

Employment will be by the hour, half day, weekly or monthly.

Standard rates will be paid according to qualifications with fares, insurance, holidays and sickness pay.

The part in this war service assigned to the Protection Division consists in the inspection of premises such as warehouses, elevators, mills and seed houses in which grain, cereals, flour, seed or similar commodities are stored. The Division inspects ships, boats, barges and boats loading grain for winter storage at the head of the Great Lakes, also for the inspection of boats at seaboard ports, in co-operation with the Royal Marine Customs Service before cargoes of grain, cereals, or other stored products are loaded.

At the same time, the Division is undertaking an intensive study, in co-operation with the Royal Canadian Veterinary College, of insect outbreaks in dead storage grain at ports on the Great Lakes and at seaboard, and the inspection of fruit and vegetables at processing plants.

As a result appropriate action has been taken in all cases known to control insect infestations and instigating effective clean-up in the sanitary areas of grain elevators and various Divisional officers are co-operating with the Board of Grain Commissioners and Department of Trade and Commerce in the examination of imported grain in their laboratories for export shipments of grain in co-operation with the Division of Entomology and the Division of Fruit and Vegetable Protection. The Protection Division maintains a close inspection of evaporated and dehydrated stock in the various factories and warehouses, with particular attention to sanitary conditions in handling and processing the products.

In addition to this war work, the Division co-operates in the seasonal fields projects conducted each year in various parts of the country for the searching and annihilating the major destructive insect pests, including the Japanese beetle, against which a special campaign is receiving close attention. Meanwhile, in the enforcement of the regulations under the Insecticide and Pest Act—in itself an undertaking considerable in magnitude which includes the inspection of plants for infestation both entering or leaving Canada and the granting or refusal of entry or export.

## Protection Against Gas

### Canadian Women's Army Corps

Canadian Women's Army Corps

Teaching Canadian Women's Army Corps

Corporals personnel how to protect themselves against attack by gas is a recognized part of the training given at the C.W.A.C. Basic Training Centre at Etobicoke, Ontario. Recognition of gas and use and care of a respirator are the A.R.C.'s of this war course.

Once a week practice are organized for the ladies along the perimeter and for an off-duty period, during which everyone works normally, they are worn as they would be in the event of a real attack.

Corporals are fitted with respirators and then show their safety and efficiency, they are paraded through a tear gas chamber where they find that they are able to hear and digest commands instantly. Without the respirator the gas causes tears and coughing.

Members of the Canadian Women's Army Corps Overseas are given additional gas instruction and drill in England.

## A Woman Sniper

### Was Captured In Normandy And Sent To England

A woman sniper who shot at American soldiers has been captured and brought to England. It was announced.

She was taken at St. Mere-Eglise on the Normandy peninsula. She was 29 years old, of Polish nationality, and had been working for the Germans. A special guard was assigned to guard her with orders to be "very wary of this prisoner."

## Livestock Increase

### Enormous Disappearance Of Free Grain Caused By Expansion

The answer to the enormous disappearance of feed grains in Canada during the past two years is to be found in the expansion of the number of live-stock and poultry sales.

The Canadian Cattle Grains Quarterly Review. Since 1941, the total number of cattle, hogs, horses, sheep, hens, and chickens in Canada have increased by 1,000,000.

Domestic cattle numbers have increased by about 14,000,000, hogs by almost 3,000,000, and cattle about 1,250,000.

During the crop year 1942-43, the number of cattle consumed in Canada for livestock and poultry feed totalled \$33,000,000 bushels, while barley was fed to the extent of 146,000,000 bushels.

In addition to this consumption of regular feed grain, less than 84,000,000 bushels of wheat went toward the maintenance of Canada's horse population.

Preliminary estimates of feeding requirements during the current crop year differ very little in total from the consumption estimated for the same year 1942-43, although oats and more grain are likely to go to animals than was the case last season.

The barley figure stands about the same in both years.—Farm News.

With a population of more than 8,000,000, Portugal has only about 5,000 radios.

## Just About FINISHED

Marshal Petain ordered freed Marshal Pétain to obey all the orders of the Germans and to cooperate with them against the Allied invaders, an order which must forever remove the name of the aged marshal from the French hall of fame.

For summing sister and brother who could surpass these sun-suited beauties?

Cook little brother duck for sister.

Tots favorites. Pattern 7089 contains the pattern for sizes 1, 2, 3 or 4 (in 1 pattern).

For the 20 cent pattern, twenty cents in coins (stamps cannot be accepted) to Household Arts Department, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your name and address.

"Because of the slowness of the mails delivery of our patterns may take a few days."

TEST YOUR SUGAR

At too high a cost to make it commercially practicable scientists have succeeded in producing synthetic sugar. It proves, at the very least, that human beings are as smart as sugar beet.

Sharks once swam in a sea where

cattle now graze in the central plain of North America.

## Canadians Passed This Way

A scene of desolation is this section of Hitler's much vaunted West Wall. The photograph was taken shortly after Canadians went through during their hard hitting drive up the lavalson beaches of France. Note two direct hits in the buildings and the abandoned German dugout. The lone Canadian soldier has found him self a chair and apparently is going to take it easy in the Nazi built dugout. This is one of the latest pictures to be received in Canada from the battle zone in France.

—Canadian Army Overseas Photo.

## WORLD HAPPENINGS BRIEFLY TOLD

Southern Alberta sugar beet growers sold 298,934 tons of beets or 290,000 bushels.

Saskatchewan farmers' cash income rose 44 per cent last year, standing at \$328,863,000 compared to \$28,190,000 in 1942.

A Christmas parcel mailed from Galt, Ont., last December to John Steele, a Canadian with the Canadian forces in Italy, arrived on May 19th, his 34th birthday.

Many species of insects hitherto unknown in Sweden have caused considerable damage to the grain cargoes which have arrived on "safe conduct" to the country.

Australia has harvested a 160,000,000-bushel wheat crop and her reserves at June 30 last was 236,000,000 bushels greatest in the history of the Commonwealth.

Great Britain is now growing sunflowers to increase the supply of oilseed, sunflowers are well suited to cultivation because of this plant as a seed crop.

Ontario's 10,000,000 hens last year laid more than 100,000,000 dozen eggs, valued at \$5,885,000 under 25 cents each, making it the Dominion's total poultry revenue.

Sixty-seven-year-old Joseph Duddington, who drove Britain's fastest train at 120 miles an hour in July, 1938, retired after 49 years' service with the railways.

Argentina has gone in for the production of sunflower seed in a big way. This year it is estimated that 3,000,200 acres are planted to this crop—almost double last year's acreage.

Ungrafted lots of fruit trees have been sent to Malta from Sicily and the Naples region for grafting with suitable varieties of apples, pears, plums and persimmons.

Prevention and treatment of blindness should be made a responsibility of the public-health departments of Quebec. Canadian Telegraph says a large call has gone to the large group of persons in Canada suffering from progressive eye disease who will "sooner or later become a charge on the taxpayer."

The known blind in Canada total 12,344, including only those registered with the Canadian National Institute for the Blind and those on pension for the blind. The figure does not include Canadians with progressive eye disease or those who have lost the sight of one eye and do not come within the definition of blindness under national legislation. They are believed to be some blind persons who have not made their condition known.

Urge efforts at present are prevention and training of the new medical students. "Health" departments are already deeply involved in the prevention of blindness, even though their legislation was not planned primarily for that reason, except in the case of preventive drops of ophthalmia neonatorum (for prevention of gonococcal infection at time of birth).

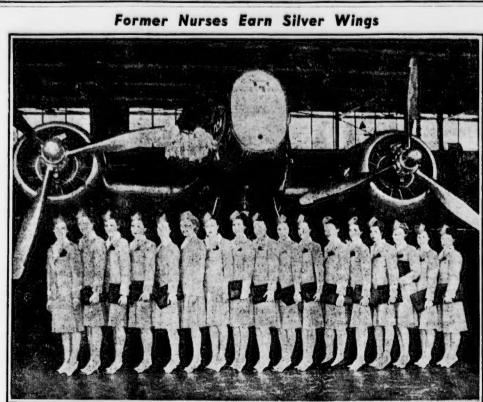

The other efforts that are preventive in character are: venereal disease control, the distribution of insulin to those unable to pay, prevention and control of tuberculosis, nutrition measures, control of all medical inspection, the provision of sight-saving classes and accident prevention.

From the above it would seem desirable to place the whole problem in the hands both of the government and in the hands of the department of public health, where it logically belongs."

### MADE BIG DIFFERENCE

Mrs. M. Marks of Montreal, Y.M.C.A. club hostess, interviewed a dejected Canadian who had received an unexpected cable from his wife, Trans-Atlantic liner, *Queen Elizabeth*, with the reason: The wife had received a cable from the husband in which one word was garbled. It read: "Am on leave in London. Having a wonderful time. Wish you were here."

On the average it takes five acres of land to raise feed for a single horse for a year.

## Former Nurses Earn Silver Wings

Wearing silver wings, symbolic of having been assigned to their duties, their graduation, 16 young ladies, all under 25, have just completed their studies in the tenth and largest class to graduate from Trans-Canada Air Lines Stewardess Training School.

Chosen from many points in Canada, these former registered nurses

have been assigned to their duties denning their new summer uniform, of which simplicity is the keynote. This chaste ensemble of grey gabardine features a wrist length fitted jacket, with three buttoned front, leading a pleasant line to a six-gored skirt.

A pale blue tailored blouse, a navy blue handkerchief and a silver T.C.A. emblem on the grey felt hat, add a touch of distinction. Grey gloves, navy blue gloves and navy and white spectator pumps complete the outfit and give the T.C.A. stewardess the feeling that she is one of the best dressed women of the age.

### Worked For Weeks

**Housewives In Britain Packed Spare Parts For Invasion Equipment**

A number of housewives gave active assistance in preparing the Allied armies for the invasion. They are grandmothers, young girls, old age pensioners who worked without pay, dressing up more than 300,000,000 articles packed and ready to be shipped whenever any unit of the army needed spare parts for its equipment.

All married housewives of Monte Cassino Abbey are stored safely in Vatican's ancient fortress of Castello San Angelo. Vatican authorities said the abbey had brought

many of the pictures, statues books and religious objects to Rome and religiously turned them over to the Vatican for safekeeping.

**MACHINERY FOR RELIEF**

All aspects of relief which have been started in Britain are connected and inter-dependent. Much will depend on food, which will depend on the machinery of relief. These emergencies have to be tackled simultaneously and with complete co-operation of all countries involved.

The Rhodesian Kaffir orange tree produces hard shell oranges which taste like dried apples.

### ENTERING THE PROMISED LAND

God's Word: Be strong and of good courage: for I have given you a good spirit, and I have not cast you out; do not fear, neither be dismayed: for the Lord thy God is with thee whithersoever thou goest. Joshua 1:9

Lesson: Joshua, Chapters 1 to 6, 23, 24.

Devotional Reading: Psalm 121.

Explanations and Comments

Assured of God's Help for a Great Task: Joshua 1:1-9. Jehovah spoke to Moses in the Tent of Meeting and said to him, "I have given to you the Spirit of wisdom and understanding, so that you may know all that I command you. I have chosen you to be a prophet to the people. You shall go to the house of Jacob and speak to it, saying, 'Return to me, O house of Israel, and I will bring you back from your exile. I will speak to you in the name of my Son, Jesus Christ, and you will be saved.'"

The task laid down by Moses, and carried forward by Joshua, was to bring the people of Israel into the Promised Land.

Joshua was given the task of leading the people of Israel into the Promised Land.

Joshua was given the task of leading the people of Israel into the Promised Land.

Joshua was given the task of leading the people of Israel into the Promised Land.

## WORLD HAPPENINGS BRIEFLY TOLD

Cyril Freitas Valle, first Brazilian ambassador to Canada, has arrived in Ottawa.

It is estimated that 20,000 Netherlanders have been executed by the Germans since May, 1940.

Pilot Alexander Polikishkin was reported to have shot down his 83rd enemy plane, becoming the Soviet ace of aces.

Claud George Bowes-Lyon, 14th Earl of Strathmore and Kinghorne, the father of Queen Elizabeth, observed his 89th birthday anniversary recently.

Birds, poultry raisers are bailing new machines that makes it possible to take a chicken from the coop, pluck it and prepare it for the oven in less than 10 seconds.

Savings deposits in Canadian chartered banks reached the all-time high of \$2,029,215,000 on Feb. 29, compared with \$2,029,215,000 at Jan. 31 and \$1,795,468,000 Feb. 27, 1943.

Another unit was added to Canada's steadily growing fleet of escort vessels when H.M.C.S. Strathadam was launched at Yarrow's yards in Victoria.

Canadian Defense Headquarters have undertaken a sharp curtailment in the use and issue of tires for the Canadian Army in Canada, and no new tires will be issued for military vehicles.

## SUNDAY SCHOOL LESSON

APRIL 16

### SAUL'S EARLY PREEACHING

Golden text: I am not ashamed of the gospel: for it is the power of God which is unto salvation to everyone that believeth.

Lesson: Acts 9:19-30; 11:19-26; 13:1-12.

**Explanations and Comments**

Paul Preaching at Damascus, Acts 9:1-2. Two weeks ago we left Paul at Damascus, where he had been. The vision of Christ on the way there had changed the rigid Pharisee, the hater of Christians, into a Christian, a concrete follower of Christ. In the first chapter of his letter to the Galatians, Paul writes: "I am Saul of Tarsus about which Luke makes no mention: 'When I was at the good please of God to reveal his secret to me, that I might preach him among the Gentiles straightway I conferred not with flesh and blood, but went up to Jerusalem to see that they were apostles before me, but even so I away into Arabia, and again I returned into Damascus." Then after 3 years he went up to Jerusalem again, not thinking that Arabia meant not the Arabian Peninsula but the country of the Roman Empire, the region of Damascus. Here in solitude Paul thought over his vision and all that it implied. He had given up his work, even as Jesus at the beginning of his ministry had gone into the wilderness to meditate on his mission.

On returning to Damascus Paul straightaway proclaimed the gospel in the synagogues that Jesus is the Son of God. The Jews who heard him were amazed, reasoning that if this was how he had come to Damascus with the avowed purpose of attacking the believers there, Paul must be really in Christian experience and ability to preach, and were greatly "proving" that the Lord was risen.

The Jews sought to apprehend him. Paul tells briefly what happened in his account of the Corinthian (2 Cor. 11:32, 33): "In Damascus the governors under King Herod the Great guided the city of the Damascenes in order to take me; and through a window I escaped into the city wall by night, and escaped his hands."

He was smuggled out of the city by night, as if a criminal, fleeing from justice.

Paul came to Jerusalem, Acts 9:25-29. Paul met Jesus, and was "breathing threatening and slaughter against the disciples," but breathing of love and peace, and was won over to them. When he tried to join them, they were skeptical of his disciple-ship. They said: "This man Paul found his past was against him."

"Paul had come to visit Cephas (Gal. 1:18). Paul was asked to be induced into the apostolic office. That authority he had received from the Lord himself (1 Cor. 14:37, 15:11). But Paul wished to carry on his Gentile ministry in harmony with the apostles, and was anxious that he could learn about the earthly life of Jesus from Simon Peter during those days. But the disciples' disdains were afraid of him. The wolf might throw off the sheep" (A. T. Robertson).

But Barnabas, "that good man" (Acts 11:24) came to his rescue. He took Paul by the hand, presented him to the apostles, and told them the reality of his commission and the worth of his work in Damascus. Barnabas succeeded in quieting the fears of the disciples at rest, and they admitted Paul to intimate and full fellowship.

### CANNOT GET OFF

Fred Kinney hopped on an open front car for a free ride and couldn't get off again until the train stopped at Belleville, Ont., 50 miles away. Something like that happened to Hitler when he hopped on his war fellowships.

### Canada's War Effort

Receives High Praise In Article In Russian Newspaper

Dame G. W. Caron, Canadian Ambassador to Soviet Russia, was host at a dinner in Moscow, to Russia's new Ambassador to Canada, George Zarubin, and Mrs. Zarubin.

Ilyya Laptev has written a long article in the State owned "Sovietada," giving details of the Dominion's contribution to the war in materials and manpower. It cited the participation of the Canadian Navy in sea warfare, and related Canada's war effort in grammar schools.

Canada is enjoying a period of warm friendship on the part of the Soviets.

Wheat acreage in the United Kingdom has been doubled since the war began.

### Tribute To Churchill

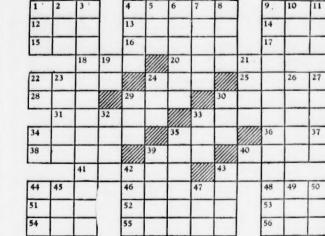

The World Needs This Man In The Anxious Times Ahead

Mr. Churchill might have added that he is not the year old before this year of 1944—his 70th filled with great perils for the Allied cause—is over; and even so vigorous a person as he is not looking to new adventures or public service at age 70. But there is no man alive who better proves the maxim at age 70. And the world need this man in the anxious times ahead. He personifies strength and courage, and the faith which hold back. —Nad Ud in modern civilization's blackest hour—Buffalo Courier-Express.

Spanish explorer in 1508 introduced American timber to Europe, believing it would cure many serious diseases of mankind.

### A WEEKLY EDITOR LOOKS AT Ottawa

Written specially  
for the weekly newspapers of Canada

By JIM GREENBLAT

The recent conference of the National Council of Physically Handicapped Ottawa made a number of significant recommendations for a well-rounded program which will take care very logically of the needs of three classes of Canadians: Dr. W. C. Ross of Halifax, director for Nova Scotia, told the call on the load with this warning: "The physical handicap can be combatuated by the three-fold program of a virile belief in God, an energetic school program and after school activities designed to interest young people who have no chance to go astray."

The Dominion Bureau of Statistics says fruit prospects for 1944 are favourable based on reports from May 27. Manitoba orchards came through the winter fine with strong weather O.K. for growth and spraying. Quebec's apple crop is equal to the 1943 season, apples are good; Ontario's outlook is excellent; apples a little below average; stone fruits very good. British Columbia's apple crop is about the same as last year. General increase in vegetable crop all over Canada.

The urgent plea has gone out for 100,000 extra workers in the expansion of Canada's ammunition production program.

Do you know that this year the shell program will absorb 15 per cent of our total steel supplies, or about twice as much as used for that pur-

pose last year. The Allies are not running short of ammunition, but they are using it up fast as the tempo of battle increases.

At Waterloo, in 1815, the British fired 37 tons of ammunition in one day. At Passchendaele in World War I the Canadian Corps averaged 10 tons every 24 hours. But today a single 25-pounder gun can fire 1 and one-half tons in one hour.

The fire power in Normandy these days may make that figure look like a country fireworks display.

Next-of-kin of soldiers overseas are asked to send vacation-time changes of address to the Bureau of Records, Department of National Defence, Ottawa, or if they cannot be easily given the name and address of relative or friend to whom any casualty telegram could be forwarded. Dates of addresses should also be given.

"The Canadian Branch suggested to the government that the first hired man for his ration book immediately on arrival, pointing out with it what they can serve better meals. Quite naturally, reporters from Ottawa say they have had to share their family's sugar, tea coffee and butter, because the hired men forget or lose their place in the line. Increasingly faced with getting meals for threshers or other temporary help hired for less than \$10 a week, should apply to their local Rational Board for transient labor coupons."

Ottawa advises next-of-kin of Canadian prisoners in Japanese hands not to put too much credence in radio messages from Japan from their relatives. Many Japanese are released for propaganda purposes. Our service handles them if they are deemed reliable. Most Americans throughout the United States and Canada have organizations that look after this sort of thing, so don't be taken in by some unscrupulous people who offer to help. If you are worried, pick up on the radio "for a consideration."

Sound advice. In connection with coal supplies as summer will soon be on the way, place full orders for coal at once; accept it whenever your dealer can supply it, and pay what is reasonable kind he can deliver. It is also suggested that now is the time to clean heating equipment; to have it in good operating condition and have storm doors and windows re-

paired ready for next winter. We all know we should follow this advice but sometimes procrastinate.

Farmers will be interested in this answer to the enormous disappearance of feed grains in Canada during the last two years. Since 1941, cattle numbers of cattle, hogs, horses, sheep, hens and chickens on our farms increased about one-third. Horses and chickens were the chief losers, hogs by nearly three million and cattle by 1,250,000. During the crop year 1942-1943 the quantity of grain consumed by cattle and hogs and other farm animals totalled 433 million bushels, while barley was fed to the extent of 14 million bushels. Besides this no less than 94 million bushels of grain were required for the maintenance of Canada's live stock and poultry. Preliminary estimates are about the same for the current crop year, although less oats, more wheat is likely to go to animals.

BOOKS OF THE TIMES

A.W. Trueman, well-known CBC man of St. John, N.B., who is heading Tuesday night at 9 p.m. a new radio show, 'Books of the Times'. Mr. Trueman is a former member of the Department of English in Mount Allison University.

## A Successful Advertiser's Ideas

John Wannamaker, founder of the John Wannamaker store, Philadelphia, was the first advertising genius in the retail advertising field. In addition to the novelty of his advertising, he kept persistently at it. He once said:

"Continuous advertising, like continuous work, is most effective. If there is any enterprise in the world that a quitter should leave alone, it is advertising. Advertising does not jerk; it pulls. It begins very gently at first, but the pull is steady. It increases day by day, year by year, until it exerts an irresistible power. To discontinue your advertisement is the same as taking down your sign. I would as soon think of doing business without clerks as without advertising."

**WANNAMAKER WAS RIGHT, AND HE PROVED IT  
BY BUILDING UP A BIG BUSINESS !**

**FOLLOW HIS EXAMPLE BY ADVERTISING

## The Carbon Chronicle

### HONEY PRICES ARE FIXED

Producers will be afforded a higher return for No. 1 white honey than for return graded honey. The Honey Prices Board now establishing ceiling prices for honey, effective June 23, 1944.

In Alberta, Zone 1, under the honey price order, the maximum price for bulk honey, wholesale, is 13 cents a

pound for No. 1 white honey, and 12 cents a pound for any other honey.

For O.R.B. the seller's shipping point.

**FINED \$25,000 ON WPTB COUNT**

Fine of \$25,000 was imposed on a Montreal clothing firm last week for breaches of price ceiling regulations,

the WPTB Enforcement Administra-

There were 165 cases tried in Canada under wartime control regulations. Sentences were heavy, including two prison terms up to one year on gasoline rationing counts.

**BUY WAR SAVING CERTIFICATES**

### ONE MAN'S INCOME

### IS ANOTHER MAN'S

### OUTgo...

If rising prices and costs were allowed to keep pushing each other up, inflation would be unavoidable. That's what inflation is—a panic rise in prices—with money losing its value and confusion everywhere. To prevent inflation, a ceiling has been set on prices and profits, wages and salaries have been controlled.

If one person demands higher prices—another higher profits—another a higher wage or salary—soon everybody would be making the same demands—demands on everyone else.

Then costs of production could not be controlled.

The ceiling could no longer be held.

Living costs would go up—

Income OUTgo  
and INCOME begin their frantic rise.

**ECONOMIC STABILITY IS NECESSARY TO MEET THE PRESENT PROBLEMS  
OF WAR AND TO PROVIDE A BASIS FOR PEACE**

LISTEN TO "IN THE SPOTLIGHT" RADIO PROGRAMME  
EVERY SUNDAY NIGHT 7:30 p.m., E.D.T.

This is one of a series being issued by the Government of Canada to emphasize the importance of preventing further increases in the cost of living now and deflation later.

## U.S. Navy Has Gained Control Of Pacific Area

**WASHINGTON**—Possibly a score of the world's most biggest United States aircraft carriers assigned to task force 58, declared by the navy to be history's "most powerful and destructive naval unit."

Rear Admiral Arthur W. Radford, acting deputy chief of naval operations for war plans, predicted describing the giant force which routed the Japanese east of the Philippines, said "We can safely assume that most of the 22 big carriers continue since Pearl Harbor have been operating as part of the vast task force."

The navy announcement said that in addition to carriers, the force was made up of battleships, cruisers and destroyers. It has been given the entire Pacific, off the coasts of Japan as its stamping ground.

The navy's statement said a Japanese pilot saw the force "scattered over the sea far as his eyes could see." A Japanese naval intelligence officer, who had been captured, subsequently reported that "we lost at task force 58 convinced him that Japan had lost the war."

More than 1,000 planes can be launched from the 1,250,000 square feet of aircraft carrier decks in the force.

"With Super Fortresses striking from the west and task force 58 from the east, our powerful, formidable Japanese homeland has at last come within range of strategic bombing forces," the navy said.

Vice-Admiral Marc A. Mitscher, 57-year-old hero commanding officer of the force, which is attached to the 5th fleet in the Pacific under command of Admiral Raymond A. Spruance.

### TO BE DISCUSSED

#### Post-War Reconstruction On Program For Coming Conference

**OTTAWA**—Some phases of post-war reconstruction will be discussed at the forthcoming Dominion provincial conference. Prime Minister Mackenzie King said in the commons.

A member of the Canadian Progressive Conservative house leader, Mr. King said he did not know when the conference would be held, but he hoped that it would be held under circumstances which would permit all the provinces to attend.

Mr. King said he was not sure whether it would be advisable to wait until after the election to hold the conference.

"On the other hand, if participation is going to continue in session until December I think we ought to have the conference some considerable time before that," said.

### PLANS CANCELLED

#### Former Luxury Liner Normandie Will Not Be rebuilt Now

**NEW YORK**—Shortages of manpower and critical materials have caused cancellation of plans to rebuild the 83,000-ton ocean liner, the luxury liner Normandie, which burned and sank at her pier in February, 1942, the U.S. navy department announced.

After a great ship, refitted for use as a troop transport, had been raised at a cost of \$3,750,000, her hull was repaired and she was taken to the Todd shipyards in Brooklyn.

Plans were made for reconstructing the ship, but not announced by the navy, which said that manpower and material which could have been used to refit the Lafayette have been diverted to more urgent needs.

### COSTLY MISTAKE

#### Nazis Rounded Up Loyal Vichy Supporters Instead Of Suspects

**LONDON**—French underground sources said that many German members of the Free French and hundreds of Frenchmen to concentration camps on D-Day, they discovered too late that they had rounded up the most loyal and innocent of persons with Allied sympathies.

At the last moment, underground leaders succeeded in switching their own file of German collaborationists for the Germans' list of suspects, these sources said.

### NOT DAMAGED

**ROME**—The famous Villa Napoleon and the Napoleon museum on the island of Elba were captured by the Allies intact, it was stated here. The Germans used the museum as a quartermasters depot. 2574

### SAWFLY MENACE

#### Fights Of Pests Have Started In Southern Alberta

**LETHbridge**—A new pest, the sawfly—the No. 1 insect pest of prairie farmers—has started laying potential damage to millions of acres of wheat in the plains area. Dominion government entomologists here are warning.

Fights of sawflies have started in southern Alberta and southern Saskatchewan and are steadily becoming heavier and more general.

Cold and damp weather has probably since the first started to emerge less than two weeks ago but entomologists explain a few days of hot weather would give rise to exceptionally heavy flights.

During the eight period expected to last until about July 10, sawflies lay their eggs in wheat stems.

Comparatively heavy flights have occurred during the past two days in the Chinookay and Chinook districts in southwestern Alberta.

### Red Cross Plans To Send More Food Parcels

**REGINA**—The Canadian Red Cross is increasing the number of food parcels sent to Europe from 160,000 to 190,000 parcels a week in order to increase the supply available for prisoners of war and displaced persons, principally Polish, Yugoslav, Greek, French and Belgian prisoners, said L. A. Winter, honorary commander of the National Red Cross Society, Toronto.

Mr. Winter was on his way east after visiting provincial Red Cross offices across Canada. He was in Regis for a two-day visit.

This food relief for prisoners in occupied countries is shared with the British Red Cross. The Red Cross societies of the other dominions and the American Red Cross, said Mr. Winter.

In a talk of aid to prisoners of war in Japan, Mr. Winter said that although continual efforts are being made to obtain the co-operation of the Red Cross, the Red Cross has not had the full co-operation which would be expected under the international convention. Relief for prisoners in Japan has been confined largely to what has been sent on the Gripsholm and other relief ships but the Red Cross is still hoping for more Japanese assistance.

While prisoner-of-war relief is the largest project in which the Red Cross is engaged, there is great difficulty in getting overseas aid, Mr. Winter said. Canadian Red Cross representatives and supplies have followed the Canadian troops into Sicily and Italy and will be with the invasion troops as soon as bases are established, he said.

### WANT TO FIGHT

**ROME**—A leftist military organization called "Armati Rossa" (Red Army)—which claims 58,000 recruits, has asked the Allied command to let them join the fight against the Germans in the C.E.E. The Comintern took place less than ten miles from the front in Sicily. Seven British officers and NCOs were also decorated in this unique investiture.

### Gen. Leese Gives Clark A Ride

Gen. Sir Oliver Leese, G.O.C. of the British Eighth Army in Italy, centre, picks up Gen. Mark W. Clark of the Fifth Army, in his jeep.

### Military Cross

Capt. G. A. Eaton, of Port Elgin, Ont., R.C.A., who was decorated by the King with the Military Cross at Buckingham Palace.

### MEDAL FOR LEADERSHIP

**NEW YORK**—Premier Stalin received the medal of the president of the supreme council of the U.S.S.R. for his leadership of the heroic defence of Moscow and for the organization of the rout of German troops near Moscow" in the winter of 1941, a Tass dispatch, broadcast over the Moscow radio said.

Soldiers of British West Africa often wear heavy rolled puttees but no shooes.

Mr. Graham said the banks must have a larger view of credit for

farmers than granting loans on a one-year basis.

Mr. Tregunning said farm credit was the only kind of credit considered to be of the long-term type, but hundreds of thousands of such loans had been carried on for longer periods after the onset of the depression. But year after year the banks had been unable to pay off their debt and there was a natural tendency for the bank to stop giving further loans as it would appear it was giving away free money.

Mr. Graham said there had been a tendency for bank branches to call in farm loans immediately. He regretted the banks had added to the severity of the depression by such action.

Mr. Tregunning said that due to the service now available from the central bank, curtailment of credit due to banks' lack of cash would not prevent.

Mr. Tregunning said loans like that granted Beaumarais had been made in 1935, 1937 and 1938, and often were for the purpose of expansion. It had been expected the banks would be able to finance them readily, but actually the banks had to carry them for a considerable number of years. The loans had been granted in ignorance, "but the world wide depression of 1930 and following years had brought about the depression."

Replies to John Blackmore, Social Credit house leader, Mr. Tregunning said there was no difference between the two in the use of currency expansion to meet the needs of government financing. The difference was as to the degree to which this should be substituted for taxation and interest-bearing borrowings.

Mr. Tregunning said loans like that granted Beaumarais had been made in 1935, 1937 and 1938, and often were for the purpose of expansion. ## CANADA'S WILDLIFE RESOURCES

### Dr. Lewis Appointed To Position Of Sept. Of Wildlife Protection

The appointment of Dr. Harrison E. Lewis to the position of Superintendent of Wildlife Protection on the Lands, Parks and Forests Board of the Department of Mines and Resources has been announced by the Minister Honorable T. A. Crerar. Dr. Lewis succeeds Hoyne Lloyd who resigned at the end of 1943 after 25 years' service.

The importance of Canada's wildlife resources and the part that they might play in the post-war years is often mentioned. Dr. Lewis is particularly fit for a position of such great possibilities and responsibilities. In his heyday days in Nova Scotia he spent many strenuous hours in the field on an interview which was later developed in the more formal channels of science at Acadia University, where he obtained a B.A. degree in 1917. After graduation he received the degree of M.A. from the University of Toronto, and in 1929 the Ph.D. degree from Cornell University. Since 1921 Dr. Lewis has served as Chief Field Officer of the Forest Service, where he has increased his proficiency in the French language, which has contributed much to his success in carrying out efficient his duties in connection with the enforcement of the Migratory Birds Convention Act. He is a Fellow of the American Ornithologists Union and is actively associated with other organizations of Canadian organizations interested in the preservation of scientific knowledge.

The extent and national importance of Canada's wildlife resources are not sufficiently well known. Over ten million square miles of land are an important resource, while the Canadian land primarily forest-producing, amounting to about one million square miles, wildlife, though a substantial resource, is not so well developed as their agricultural land.

The most recent estimate of the practical value of wildlife in Canada shows an annual harvest calculated at \$22,710,000. The principal sources of income are fur trapping and hunting. The potentialities of greater wild fur development as part of Canada's post-war reconstruction programme was recently presented in a brief to the Parliamentary Committee on Reconstruction by the establishment under the chairmanship of Mr. Gray Turgon. It is evident that in a country with the distribution of land quality that Canada has a unique responsibility as a place of special national importance. Since these living resources, if correctly treated, are self-reproducing and inexhaustible, their importance cannot fail to be realized. It is evident that there will be no peace to insure the welfare of man unless he uses and proper treatment that importance can be greatly augmented.

It is why the position of Superintendent of Wildlife Protection assumes such an important rôle in this time in the history of Canada. Dr. Lewis is a strong supporter of wildlife management and is the author of more than 200 papers on wild birds and mammals and their bearing on the training experience and enthusiasm necessary to insure the maximum scientific development, as well as the most intelligent use of Canada's wildlife resources.

### Origin Not Known

#### Any Kind Of Leather Bag Was Called A Budget

How the budget came by its name is one of the curiosities of physiology. It is a term that has come into being as budgets probably from the old French "bougette." Formerly chancellors took the papers relating to their annual financial statement to the house in such a small bag and when the budget was ready it was merely to take the documents from the bag and present them to parliament.

The chancellors' bag went out of use in the early years of last century. It was a green bag such as was commonly used by lawyers. When in 1820, papers relating to the trial of Queen Caroline were laid in the green bag, the papers were presented in a green bag. Immediately green bags became hateful to the majority of the people whose sympathies were with the queen. The bags were prohibited, but no lawyer could safely carry one through the streets. The result was that such bags disappeared both from the law courts and the house of commons—Manchester Guardian.

Before the war, between \$90,000 and \$90,000 British people worked in the catering industry.

The word "glad" formerly meant good story or glad tidings.

## Post-War Planning

### Industry Should Be Able To Provide Plenty Of Work

In all the years of war we have never countenanced the suggestion of ultimate military defeat; yet there seems to be a general feeling in Canada an attitude of defeatism regarding the problems of peace. This attitude is represented by the suggestion that our only hope lies in continued employment in the areas to come as by continued deficit spending; that is, government spending on work which has all outgo and which gives no promise of future revenue. If those who hold this wrong line of thought could be led to see us over the reconstruction days, most people would agree with them, but these tumultuous months have not led to the most thoughtful of us to this conclusion. Is there any future worthy of our hopes where work's main object is the passive one of merely keeping people employed?

The Canadian government insist that there is no other alternative. They urge that in these peaceful days we can set 3,000,000 persons as the total of our employables, and that we were reasonably well provided for in the months of war, though there were unemployment. Now they tell us that, with 2,000,000 still engaged in agriculture, another 1,000,000 or more in war industry, and some 700,000 in full-time workers in the war services, we have 1,000,000 new workers for whom we must provide employment. They urge that the task is beyond the capabilities of industry that are capable of such an insurmountable problem—that of replacing war orders with an equivalent demand for peace time goods.

But are these facts and arguments as cogent as their advocates believe? War dislocates many industries, but the war does not change them. It is doubtful, for instance, if many of the women now employed in industry will continue to accept it as their natural vocation, nor the location of a home is a sufficient guarantee that the war surplus will be absorbed there by the natural surplus of workers disappears.

As for the ability of established enterprise to adjust itself to the conditions of peace as it did to the ways of war, it is difficult to say with certainty. And surely the same courage and audacity and vision that accomplished the one might as easily accomplish the other. It is at least as plausible that the war has improved the makeshifts of government made jobs. A half a world has been destroyed. There is no need to be crying for almost anything that may happen. The times are now and dynamic forces at work, and the old lands of China and India and the islands of the sea. Somebody has to supply a large proportion of the necessities of the world with their necessities. That somebody has to be the next generation, standing high among the suppliers were Germany and Japan. It will be years before these two brigands are ready to bid again for the world's markets. But Canada can do what she can in a better position to do so.

Canada, with her vast old lands of China and India and the islands of the sea. Somebody has to supply a large proportion of the necessities of the world with their necessities. That somebody has to be the next generation, standing high among the suppliers were Germany and Japan. It will be years before these two brigands are ready to bid again for the world's markets. But Canada can do what she can in a better position to do so.

Another whitewash in smaller volume may be made as follows: take a large clean cloth put one bushel of salt and shake with a stick over boiling water, covering it during the process to keep in the steam. Strain the liquid through a fine sieve, then add three lbs. of alum and two lbs. of common salt. The alum and the salt having been previously dissolved in hot water.

Another standard recipe is: Slightly boil a piece of lamp wick with boiling water in a barrel, strain it and add one quart-peck of salt dissolved in warm water, 2½ lbs of flour made into a thin paste with boiling water, and a quart-peck of grain dissolved in warm water. It is recommended that this whitewash be applied hot.

It may be true that such demands mean money which industry unadjusted will not be able to meet. But the answer is that the people of this country, in the strength of their own destiny, can be right with the timid souls who are waiting for the government to send its earthly ravens to feed them.—From Liberty Magazine.

## Best In The World

### No Nation Beats Canada Making Ammunition, Says Artillery Major

Canadian manufacturers are doing a good job in supplying materials of war. Cpl. Preston Brown, who served in Supply with the Canadian Army anti-aircraft unit, told the Canadian Manufacturers' Association at Toronto.

An artillery major, he said, had had a chance to examine Canadian shells and said the best made by any nation in the world. "Our gunners conserve their Canadian shells because they know they will not fail them in a pinch."

Buffalo milk is the source of the cheese that is used in Canada's fighting men.

## This Thousand Pounder For Adolf's Birthday

It was Adolf's birthday, so the lads of the R.C.A.F. bomber group's "Goose" squadron decided to send him a present, suitably inscribed. It was this thousand-pound bomb which found its mark in an attack on Cologne. Seen in the photo, left to right, Flt.-Sgt. Mike Bartman, Vegreville, Alta.; AC1 Don Rotheny, Deep Creek, Sask.; Sgts. Harry Russell, Windsor, N.S.; LAC. Harry Elricks, Windsor, Ont.; Sgt. George Oliver, Liverpool, Nova Scotia.

## Farm Whitewash

### Recipes For Making Whitewash For Farm Buildings

Here are several recipes for making whitewash of various kinds for whitewashing farm buildings.

A rainwater whitewash for wash for the outside of houses is made by shaking 42 oz. of quicklime in 10 gallons of hot water, and then adding 2 lbs of salt and 1 lb of zinc sulphate which have been previously dissolved in two gallons of water. Add 10 lbs of alum and 10 lbs of lime added to the mixture. The addition of one ounce of alum improves the whitewash, but is not necessary. To prevent rust, the salt is washed off with water and then rinsed.

An effective disinfectant whitewash is made by dissolving 50 lb of lime in eight gallons of boiling water; then add six gallons of hot water which contain 10 lb of alum and 2 lbs of zinc sulphate. It adds a gallon of lime to every 25 gallons of the mixture. Also add one lb of cement to every three gallons, and stir thoroughly. A quantity of coarse disinfectant should be included in the lime, but try to prefer the white when the colour is to be kept white.

Another whitewash, in smaller volume may be made as follows: take a large clean cloth put one bushel of salt and shake with a stick over boiling water, covering it during the process to keep in the steam. Strain the liquid through a fine sieve, then add three lbs. of alum and two lbs. of common salt. The alum and the salt having been previously dissolved in hot water.

Another standard recipe is: Slightly boil a piece of lamp wick with boiling water in a barrel, strain it and add one quart-peck of salt dissolved in warm water, 2½ lbs of flour made into a thin paste with boiling water, and a quart-peck of grain dissolved in warm water. It is recommended that this whitewash be applied hot.

## They Started Something Thanking The Sergeant

### But Germany Found Air War Could Work Two Ways

Here are iron and nemesis at work. The Iron Guard has acquired a fine anecdote, much of it obscured by Nazi military to date, for the authenticity of which we depend on respondent voices. In the very early days of the L.D.V., an ex-servant of the old school complete with mustache, moustache, roaring paragraphs and all, was serving in a platoon which was moved to him in spite of his long and varied military career. It was living like a king while the Iron Guard was being fought and decimated hundreds of miles away on other people's soil, in other people's mines and barrows. But when German leaders invaded the Luftwaffe over Poland and the Lands and Franks they were ultimately inviting the British Lancasters and the American Fortresses to return visit Berlin. Germany, which invasion was not initially accepted.

The insatiable fury which the airplane has destroyed is the one situated between the Rhine and the Carpathians.—New York Times.

## Captured In France

### Young Russian Said He Was Forced Into German Army

A 13-year-old Russian boy, in a German uniform, several sizes too big for him, was among prisoners taken by the German Paratroopers when captured in France. The boy told the intelligence officers he had been forced into the German army a year ago and sent to work after he had been captured.

The young Russian was held for more than 12 years of age and his age was established by papers found on him. He seemed apathetic about being taken prisoner and looked around in wonder at British officers, but he brightened considerably when put aboard a ship for England.

### How The Raw Recruits Showed Their Appreciation

The Home Guard has acquired a fine anecdote, much of it obscured by Nazi military to date, for the authenticity of which we depend on respondent voices. In the very early days of the L.D.V., an ex-servant of the old school complete with mustache, moustache, roaring paragraphs and all, was serving in a platoon which was moved to him in spite of his long and varied military career. It was living like a king while the Iron Guard was being fought and decimated hundreds of miles away on other people's soil, in other people's mines and barrows. But when German leaders invaded the Luftwaffe over Poland and the Lands and Franks they were ultimately inviting the British Lancasters and the American Fortresses to return visit Berlin. Germany, which invasion was not initially accepted.

The insatiable fury which the airplane has destroyed is the one situated between the Rhine and the Carpathians.—New York Times.

At the end of the parade he was asked if he wanted to remain in the army or not. He said he did not want to remain in the army more in sorrow than in anger when one of their number took a pace forward from the ranks and started shouting. The boy said he was a sergeant and he was promoted to that rank.

Gentlemen, I should like to propose a vote of thanks to the sergeant for his efforts with us tonight!

Nobody knows what the sergeant's name was, but as he was left to be swallowed hard and looking slightly dazed—Manchester Guardian.

### BETTER WORD NEEDED

"That's a terrible word," said a sergeant. "I don't like that word. It's ridiculous. Indeed, that word is ridiculous. But it should be possible to coin a word free of snobbish implications and more in keeping with the dignity of honest and independent folk.

Battery hoarding in futility, since an unused battery will steadily discharge itself.

## FACTORY-BUILT HOMES PROMISED

### Can Be Ordered In Morning And Delivered Before Night

After the war comes a time when telephone your order for a new house in the morning and have your friends over for dinner the same evening.

This is the promise made by the Palmer Corp., builders of factory-built homes in Flint, Mich.

Worrying about blueprints, materials, furnishings or moving will be unnecessary, the corporation says.

Here is the corporation's post-war plan:

At a fraction of the cost of other types, five-room homes with baths, assembled completely in the factory. Outlets for these finished houses will be set up like automobile showrooms in every community. Catalogues will make it possible for the purchaser to place his order by mail or telephone.

In a few hours the house can be ready for transport to the purchaser's lot, and half an hour after its arrival the family can move in—requiring nothing more than sheets and a mattress.

If your family grows, one phone call will be all that's necessary to deliver an extra wing with a nursery—or a guest room in case you are anticipating a household of guests.

The first production of these factory-built homes will depend on transportation costs.

"We believe we have answered all the major problems of the low-cost housing industry," said D. D. Arehart, president of Palmer Corp.

The firm's present capacity is nearly 1,000 complete homes a month. With its additional factories and improved machinery after the war, Arehart expects to triple the output.

## About Helicopters

### Army Men Does Not Think They Will Come Into General Use

If it comes, it has its compensations, for an authority on helicopters, writing in a recent issue of the Saturday Evening Post, tells us that one of our war aims, namely, that the post-war period may not be realized. If the authority, Colonel H. F. Gregory of the U.S. Army Air Forces, is correct, and we hope that he is, the helicopter will be a bad yardstick for a future war.

The firm's present capacity is nearly 1,000 complete homes a month. With its additional factories and improved machinery after the war, Arehart expects to triple the output.

(1) That even with a large demand for helicopters and mass production the cheapest of these machines will double as landing grounds for helicopters. The Colonel foresees a great future for these machines for both military and commercial purposes, but he cannot see a helicopter in every garage. His reasons are briefly:

(2) That the landing rotor of the "charwoman" will be replaced by any such crack jaw that would be willing to pay a price which places it beyond the reach of the vast majority of the people. The first five helicopters built for the U.S. Army during the present war cost \$100,000 each.

(3) That the landing rotor of the "charwoman" will be replaced by any such crack jaw that would be willing to pay a price which places it beyond the reach of the vast majority of the people. The first five helicopters built for the U.S. Army during the present war cost \$100,000 each.

CARBON WINS BASEBALL  
GAME AT AVONDALE TUES.

The Carbon and Avondale baseball teams battled to a 2-2 score at the Avondale diamond on Tuesday evening, in a very close and interesting game that the Carbon team won over the visitors.

The following were the line-ups:  
Avondale—L. H. Bichick, Jack Gordon, Cliff Gordon, Clifford Ohlhauser, R. Saller, Don Gordon, Ben Hermans, Johnny Schmidt and Oscar Gackle.  
Carbon—H. L. H. Bichick, Leo Ohlhauser, E. White, Heath Gordon, A. Giesek, Chas. Pattison, Ted Schmidt, John Reid and Robt. Gabbehouse.

Mrs. E. Harding of Victoria, B.C., arrived Friday and will spend a month holidaying with her parents, Mr. and Mrs. Dave Halstead,

TOWN AND COUNTRY  
PERSONALOGRAHS

Pete Gordon Bramley of Wetaskiwin spent the week end in town.

Miss Jolynne Milligan is visiting in Carbon with her parents, Mr. and Mrs. Wm. Milligan.

Miss Marion Torrance left Monday to resume her studies at the University of Alberta. She will return after three weeks' holiday spent in town with her parents, Mr. and Mrs. S. F. Torrance. Mr. and Mrs. Torrance accompanied her to Calgary Monday.

Mrs. Martin Lang had a very successful auction sale at the Otto Martini farm last Wednesday afternoon.

Mrs. Gerald James received word yesterday that her son, John, has been hospitalized at Camrose and left Thursday day for that town to attend the funeral. She expects to be away about a week.

FREUDENTAL BAPTIST CHURCH  
E. S. Pease, Minister

SUNDAY, JULY 9

Freudental Church:  
10:00-11:00 a.m. ..... Sunday School  
11:00-12:00 p.m. ..... Worship Service

Zion Church:

10:00-11:00 a.m. ..... Sunday School

11:00-12:00 p.m. ..... Worship Service

Carbon Church:

Evangelistic Services will be held in the large hall at Carbon, from July 10th to July 23rd, with the Rev. P. W. Bartel from Janestown, North Dakota serving as evangelist. These services will be conducted in both English and German language, according to the following schedule:

7:30-8:00 p.m.—Bible study in German  
8:00-8:45—Evangelistic message in English.

There will be special singing at all services.

OUR INVITATION:

To all who mourn and need rest—to all who are weary and need rest—to all who are friends and who have friends—let us all come to Jesus—all who do not, but ought—to all who sin and need a Saviour, and to whosoever will—these churches open wide their doors and welcome all of Jesus, the Lord say: WELCOME!

CARD OF THANKS

I desire to express my sincere appreciation to the Carbon Old Timers for the beautiful flowers received while in Hospital. Also for the many kind greetings.
